

Power Fe

IRON AND AMINO ACIDS: THE WINNING TEAM

20KG

1200KG

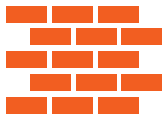

Conveyed and protected iron supply

NUTRITIONAL COMPOSITION	%
Iron (Fe)	6
Complexing agent	Humic acids and plant amino acids

TECHNICAL SPECIFICATIONS	
S.W.	1.18
pH:	4

DOSAGE AND METHOD OF USE		Fertigation
CROPS	PHENOLOGICAL STAGE	DOSE kg/ha
ALL CROPS	Resumption of growth and post-harvest or when the first symptoms of deficiency appear	15-25

NOTES: ● In the most deficient soils and for crops that are more susceptible to iron chlorosis, it is recommended to repeat the application with MicroSync Fe every 15-25 days.

Laevorotatory plant amino acids and readily available energy for the plant

Increased nutrient efficiency: conveyance, modulated absorption and transport

ORGANIC FARMING
